

Reducing Data Gaps and Latency

Data Gaps - How many? Classification?

- Source? Ex., backup power, dual telemetry
- Methods to reduce electronic noise? Grounding, magnetic shielding,
- What other factors contribute to data gaps?

Latency - How long is too long?

- Is this a problem?
- What are the causes?
- How to reduce?

Reducing Data Gaps and Latency

Notes:

Equipment LifeCycles and Replacement Criteria

RSNs have a policy or goal for the replacement of equipment? Loggers, Sensors, Batteries

Anything else worth mentioning?

RSNs have a policy or procedure for this?

Does ANSS have a policy or procedure.

Survey Results

Mouse: PNSN, HVO, Utah, Alaska

Fabia: SCSN (Southern California), **BK, EMP, SCSN**
(South Carolina)

Equipment LifeCycles and Replacement Criteria

Notes:

Safety and Best Practices Session

Group Discussion (shout out response or put in chat)

- Worse injury?
- Most common injury?

*Story Time. What is working and what isn't.
Training and Policy.*

Safety and Best Practices Session

Notes:

Training Opportunities and Needs

Open Forum

- What PNSN learned from the all hands
- What training is needed.
- What training is mandatory at RNSs.

Training Opportunities and Needs
